How to Locate and View Quiz Results and Statistics

In this section, the instructor will learn how to locate and view quiz results and statistics for specific questions on said quizzes. At this point, you need to have a course set up, created a quiz and have had students take your quiz. If you have questions on these prerequisites, please visit the previous instruction pages.

1. Navigate to the Course Overview page.

2. Locate the quiz you want to look at stats for. Click on the Quiz Statistic button. To find this button, locate the square, blue icon with a white bar chart.
3. Click on **Team Quizzes** to view all responses taken by a team. Click on **Individual Quizzes** to view all quiz results taken by an individual. After clicking one of the above options, a drop down menu will appear showing statistics for specific questions from the quiz of interest.
4. Select the question you are interested in viewing.
5. Here you will see a chart showing the statistics of the quiz question of interest.

QUESTION #3

Question: Who is Captain America’s love interest?
